## Copied tapes seized — Judge told

Cassette copying equipment was seized in a raid on a doctor's home, a High Court judge was told.

Microdeal, the Cornish-based software company, had been granted a "search and seize" order at a private hearing.

It enabled the company to search the premises of Dr T. Mohamed in Blackburn and take away any offending copyright material.

Microdeal alleges that Dr Mohamed and Mr T. Mohsan — believed to be Dr Mohamed's 14-year-old brother — have been copying Dragon games such as Eight Ball, Katerpillar Attack, Scarfman and Space War.

Miss Mary Victoria, for Microdeal, told Mr Justice Mervyn Davies that the company had obtained "quite a lot of interesting material" when the order was executed.

She read a sworn statement

*Continued on page 5*

## School's over for Chris

A schoolboy is dropping his 'A' level course to invent computer games. Christopher Kerry, 17, of Batemoor, Sheffield, wrote the game Jack and the Beanstalk, currently high in the charts.

The game achieved top status and popularity even without advertising. And the company marketing the game, Liverpool's House of Thor, is now planning a massive promotion for it.

Now Christopher, who feared he would be joining the dole queue, may earn tens of thousands of pounds in royalties.

Christopher was studying physics, chemistry and computer studies at Jordanthorpe school. He left before the end of the summer term of his first year in the sixth form. Assistant head, Mr Heath said: "Christopher is a very capable young man with plenty of initiative. We wish him well."

Christopher is now signed up

# PEAKSOFT **TIM LOVE'S CRICKET**

"I've just been reading your advert. It says Tim Love's Cricket is the most realistic cricket game yet produced for any home micro."  
"That's right."  
"Well, you've got to say that, haven't you? I'm surprised you didn't say it swept the floor and made the tea as well. It says it's under total joystick control."  
"Right again."  
"Are you saying I can use a joystick to make the bowler deliver an off-break pitched two feet to the bowler's left, six feet from the crease...?"  
"With practice, certainly."  
"...hang on, I haven't finished yet. And to fool the batsman, can I make it a quicker or slower ball than usual?"  
"Finished?"  
"Yes...no - can I also, using the joystick, control where the bowler releases the ball and the direction in which he bowls it?"  
"Finished now?"  
"Yes."  
"The answer's still yes - and you'll see it happen in full-bodied, animated graphics."  
"What about the fielders - can I position them myself?"  
"Of course."  
"With the joystick?"  
"Naturally."  
"Well, just how realistic is it? For example, what happens if the batsman gets an edge?"  
"If it's a Denis Lillee special, he might be lucky and fluke a boundary. On the other hand, he might be caught in the slips."  
"You do, of course, control the batsman with the joystick."  
"Of course."  
"Come on - there must be a limit."  
"Ask away."  
"All right - can I pick my own team, decide how skilful each batsman and bowler is, can I practise bowling, be out LBW, run out or bowled, can I hit my wicket or be caught, are there byes, no-balls and wides, does a deep wicket help the spinners, if I need a break, can I save the game...?"  
"Hang on, let's catch up. Yes, yes, yes, yes, yes, yes, yes, yes, yes, yes, yes and yes."  
"And what happens if I've no-one to play against?"  
"Your Dragon will give you a game - at any of three skill levels."  
"Dragon? Dragon? I've got a Spectrum. What are you going to do about that?"  
"Sell you a copy of Space Invaders."  
**TIM LOVE'S CRICKET. ONLY FOR THE DRAGON 32. £8.95**

**Tapes**

*From front page*

by the solicitor who carried out the order in which he said that Dr Mohamed had "readily admitted" copying Microdeal's tapes and that he had found recording equipment, blank tapes and tapes which had been copied.

Nothing, however, had been found at the boy's home.

Neither Dr Mohamed or Mr Mohsan were present or represented in court.

But Miss Vitoria said Microdeal's solicitors had received a phone call from Dr Mohamed denying all knowledge of the matter.

The judge agreed to continue an order banning Dr Mohamed from infringing Microdeal's copyrights until a further hearing last Friday. He refused to make any order against Mr Mohsan.

**Chris**

*From front page*

as a freelance for Thor and he will receive royalties for Jack and the Beanstalk. His brother, Steven, helped with the graphics, an outstanding feature of the game.

Christopher came up with the idea of Jack and the Beanstalk because he thought people were getting fed up with space games and shoot-outs. Now he is going to think up some more new games.

Jack and the Beanstalk received a five-star rating when reviewed in Home Computing Weekly. "Frustrating but challenging; if you want a difficult action game this can certainly be recommended"; our reviewer wrote.

Headmaster Ken Cook says he is not worried about Christopher dropping 'A' levels and he is sure he will be a big success in computers.

**No longer in the dark**

Broadway Electronics chose to herald its mushrooming expansion plans by sending mushrooms to numerous computer personalities. Half-pound punnets of fresh mushrooms were delivered to their desks following the opening of new high tech headquarters in Bedford in March. Plans have been kept in the dark while new marketing strategies were formed.

Mushroom Computers becomes the parent company, responsible for marketing and manufacturing BBC/Electron add-ons. Broadway Electronics becomes a subsidiary and continues as Mushroom's retail arm. Mushroom Software and Mushroom Electronics are two other subsidiaries.

Paul Vaughan, managing director, said: "While continuing to manufacture peripherals for Acorn, we will develop independent products to an increasing degree."

*Broadway Electronics, Aston Rd, Bedford, Beds MK42 0LJ*

**PSS track success**

Kevin Bowes, the motorcyclist sponsored by PSS, is having a successful season. He is currently lying fifth in the Marlboro Clubman's Championship. This is only his second season, yet he has completed over 30 races.

Kevin is a 23-year-old Coventry printer, who took up racing motor bikes as a hobby. His progress against local rivals was quick, and PSS decided to back him in his career on the track.

Kevin has qualified for the Marlboro Clubman's Championships at Silverstone on September 22 and 23.

*PSS, 452 Stoney Stanton Rd, Coventry CV6 5DG*

**Run for fun**

The third annual Cambridge festival half-marathon, sponsored by Sinclair Research, has attracted a record 2,599 entries, including British Olympic marathan hope, Joyce Smith.

The half-marathon will take place on Sunday 15 July. Leading Sinclair staff have been persuaded to take part and Sir Clive and managing director Nigel Searle plan to jog along with the rest.

The fun run starts at 8.30 a.m. and the course is from Parkers Piece, Cambridge, through Fen Causeway, Grantchester and Trumpington. If you would like to participate, call Eddie Sharp at Cambridge City Council on 0223 358977.

**Stop those headaches**

Do you see spots before your eyes or feel a pounding in your ears after spending hours in front of your trusty micro? If so, you could be suffering from vision disorders or headaches, known to be problems faced by TV computer users.

You may find relief from

your ailments if you invest in an anti-glare filter, available from Romag. CEAF is a laminated filter combined with a diffused etched face which dissipates unwanted reflections. CEAF fits the curvature of the screen and is fixed on by velcro.

CEAF will retail for under £20 and should be in stock at your major high street computer dealer.

*Romag, Patterson St, Blaydon on Tyne, Tyne and Wear NE21 5SG*

**Scary monsters**

Just out on the Commodore 64: Bonzo, from Audiogenic. Audiogenic says that Bonzo features brilliant full-screen graphics and "some of the most devious and vicious monsters ever devised".

You're a workman who must collect boxes from different levels of the screen. You must climb up and down ladders, avoiding monsters who are guarding the boxes. The monsters react intelligently and try to trap you on a particular level. Price: £5.95.

*Audiogenic, B PO Box 88, Reading, Berks*

# Win a weekend for two in

## FROM OPTIONS

Our top prize in this week's competition is a weekend for two in Paris. Paris is an exciting city; the Parisians are stylish and elegant and enjoy the French tradition of drinking at roadside cafes and watching the world go by. You'll soon get into the swing of it.

Stroll along the Champs Elysées, climb the Eiffel Tower and take a boat ride down the Seine. Wander round the Galeries Lafayette and spend an hour or so in the Louvre. While Paris is rich in cultural heritage, it's also up to the minute in fashion and design.

There's so much to do in Paris that a weekend can only give you the taste of this city at the heart of France. The cuisine is justly world famous and wine is cheap. And now you have the chance of visiting Paris — at Option's expense.

The top prizewinner of this week's competition will be flown out to Paris, courtesy of Options, and will stay in a hotel at Option's expense together with his or her companion. This is an ideal opportunity to enjoy an off-season weekend break in the French capital.

Fifty additional prizewinners will receive one of Option's range of educational software, which runs on the BBC and Commodore 64. In the shops each tape costs £8.95 (£9.95 for disc) so the prizes are worth £500.

All you have to do is suggest three applications for adult software. Options is planning to release non-technical software for Mums and Dads and wants you to send in your brainwaves on what would keep them fascinated.

Options is currently preparing a birthday book package, in which the user can retain all necessary dates, as well as a gardening program. What can you think of?

Options' educational software also involves parents. Each program has the facility for addition of data and questions. For example, after the demo program has been run, an adult could type in

questions which are relevant to the child's school syllabus. That's one way of involving both parents and children.

Options is a new company formed in June 1984. Options wants to encourage adults to use home computers. David Collins, manager, said: "In 99 out of 100 cases Mum and Dad bought a computer for their child and hoped it would provide help with homework. Our educational packages are ideal for that."

He continued: "What we want now is to provide software for their own use. There's really nothing on the market at the moment for adult leisure. There's only games and technical packages like spreadsheets."

So put on your thinking caps and send us three original ideas — and you could find yourself on that plane winging its way to Paris!

### How to enter

Write on the coupon, in order of importance, three original ideas for adult software. Explain clearly and concisely your reasons why each program would interest adults. Your ideas should be non-technical programs for adults with little or no knowledge of computing. Please do not include the names of any arcade or non-arcade games.

Complete the sentence "I'd like to go to Paris because..." in not more than 20 words. This will be used as a tie-breaker, in the event of more than one person being eligible for the top prize.

Write in your name and address and computer (Commodore or BBC). Complete the coupon clearly and fully — it will be used as a label if you are a prizewinner. Please include your age: if you are a top prizewinner and are under 18 you will need to be accompanied by an adult companion.

Send the coupon to Options Competition, Home Computing Weekly, No. 1 Golden Square, London W1R 3AB. Entries close at first post on Friday August 10, 1984.

## Take off for a weekend in Paris courtesy of Options. And we're also giving away 50 tapes from Options

You may enter as many times as you wish, but each entry must be on an official coupon — not a copy — and sealed in a separate envelope. **Important:** please follow carefully the guidelines on entering — incomplete coupons cannot be considered.

### The rules

Entries will not be accepted from employees of Argus Specialist Publications, Options and Alabaster Passmore & Sons. This restriction also applies to employees' families and agents of the companies. The How to Enter section forms part of the rules.

## Options Competition

### Entry Coupon

1 \_\_\_\_\_

2 \_\_\_\_\_

3 \_\_\_\_\_

I'd like to go to Paris because \_\_\_\_\_

Name \_\_\_\_\_

Address \_\_\_\_\_

\_\_\_\_\_ post code \_\_\_\_\_

Computer (BBC or Commodore 64) \_\_\_\_\_

Age (if under 18) \_\_\_\_\_

Complete clearly and fully — if you are a winner this will act as a label for your prize. Post to Options Competition, Home Computing Weekly, No. 1 Golden Square, London W1R 3AB. Closing date: first post, Friday August 10, 1984.

# Will you be a cricketing star?

You stand nervously at the crease as an expectant hush falls over the crowd...

That's how One Day Cricket, for the 48K Spectrum, begins. Your challenge is to get the best high score or beat a random high score.

The program holds Essex and England teams and choice is made depending on whether you select 40 or 50 overs.

These may be changed by altering the following lines (where x\$ is Essex/England and f\$ is the opposition):

```

802 & 812 venue (county/
809 & 819 data (county/
international)
2002 & 2501 data (county/
international)
2004 & 2503 x$ Essex/England

```

The opposition is randomly chosen for cosmetic purposes and does not affect the outcome of the game.

At the end of the innings the scoreboard and score card may be copied on the ZX Printer.

Spectators on each side of the scoreboard raise their arms if a six is hit or a wicket falls.

At the end of each over you are given the option of obtaining the run rate and the required run rate. The scoreboard keeps track of total runs scored, batsman's runs, total when wicket fell, overs bowled, wickets fallen and bowler number bowling.

You play the game using three keys: 1 defensive stroke, 2 attacking/solid stroke, 3 aggressive stroke. Full details are in the program.

Capitals which are underlined are UDGs and should be entered in GRAPHICS mode. They are: A-M wicket, N spectators, O arms aloft, P spectators with arms aloft, Q indicator for bowlers.

*MSX computers are big news. Backed by some of the biggest names in electronics, the stylish new computers are due in the UK from Japan in September.*

## We give you the rundown on who's planning what for MSX

Yamaha's MSX micro, due here in November, will also be a musical instrument, with its own remote piano-style keyboard

The system will cost about £600 and will comprise Yamaha's CX5 computer with a built-in sound module and added keyboard.

Jerry Uwins, marketing manager for the company's UK arm, Kemble-Yamaha, said "With 48 preset sounds it can sound like a piano, trumpet, violin... any instrument you care to name

"Composing is going to be one particular feature

"One of the important points to stress is that the various squeaks and squawks that you get out of Commodore and Sinclair are not in the same league.

"The sound is very similar to our DX9 synthesiser, which is a proper, pedigree musical instrument using proper classical notation"

The MSX computer from Sony will probably be called the Hit Bit.

Sony's new business manager, Mike Margolis, explained: "Until a week before we launched the Walkman we were in two minds about whether to use the name

Number 3

July 24, 1984

# COMPUTING

"We thought: 'Why call it a silly name like Walkman... it's ridiculous.' We thought long and hard about it. But it's now part of the language. It has a personality and it's part of a lifestyle.

"A lot of the thinking behind the computer was done by the same people who are behind the Walkman, so we would

expect the same unique approach. The uniqueness of the name has been an advantage to the Walkman and it would be the same for the computer"

Sony's present range of products in the UK include hi-fi, audio, video, TV and broadcasting equipment for both TV and radio.

And Mr Margolis said the computer would be sold through dealers who are currently selling Sony products

Answering criticisms that the MSX standard could delay computer development, he said: "The way we see home computers is that they have traditionally been developed by boffins, reviewed by boffins and bought by boffins.

"They are people who are interested in computers for their own sakes. We believe there are a lot of people who are interested in home entertainment, not only to do their own programming

"There is a large number of people who are afraid of buying home computers. They are not sure what to buy and they have a whole list of fears."

The only reason for innovation was to bring benefits to the consumer — which would continue to be done with MSX — but there was no point in putting the latest chip into a home computer to sort 10 megabytes of information more quickly

Speed of games was important, though. And the format allowed considerable sophistication, not only with discs and the CP/M business operating system to come, but also the possibility of a second processor — increasing speed by two to three times — within about three years.

He stressed, however, that the computers would always be upward-compatible. The companies making them were highly competitive and their only common ground was compatibility

Mr Margolis said Sony would be bringing out its own

Continued on page 3.

**What MSX will mean**  
MSX will cure the major headache for home computer users and dealers software for one micro won't generally work on another maker's range

Several Japanese companies have got together to bring out computers which all use the same BASIC and operating system. And European and American computer makers are thinking of doing the same

It means that all software and peripherals will run on any computer using the same standard, designed by the U.S. company Microsoft. MSX stands for Microsoft Extended

MSX computers are due in the shops in September from, among other companies, Hitachi, Teleton Sanyo, Mitsubishi, Sony, Toshiba, Canon and Yamaha

Continued from page 1.

peripherals, like disc drive and joystick, but probably not a standard joystick.

He said: "We pride ourselves on being innovative"

Toshiba expects to have its computer in the shops in September/October. Product manager Chris Greet said "We're been ahead of the field in Japan, so we will possibly be one of the first in the UK."

UK buyers had the advantage that they would be getting the second generation of MSX computers, advanced on what first went on sale in Japan.

Talking of computer development, he said that the problem with boffins and research staff was that they always wanted to wait for the next advance before bringing out a computer

He felt that in the beginning there may be some confusion in the minds of buyers about which MSX computer to choose. But this would be cleared up as each manufacturer advertised and promoted its additional features.

He said: "At the end of the day the machines are completely different. Some have cassettes built in, some have got built-in joysticks."

JVC's computer, made in the town of Ewai, 50 miles north of Tokyo, will also have 64K of RAM and cost will be about £250. The company also plans to offer a monitor, 3½ in disc drive and a data recorder.

JVC's assistant marketing manager, Stephen Michaels, said his company was also thinking of introducing a 5¼ in drive because that format was quite popular.

be running training courses for dealers before the launch."

There would also be training for service engineers at the same centres, as well as in Scotland and Ireland

Mr Michaels said: "I don't see many problems on that side — video recorders are far more complex and our dealer network can service them already. Computers are a piece of cake"

JVC, short for the Japan Victor Company, is the inventor of the VHS video recorder format — which now had a claimed 80 per cent of the market — and makes video recorders, TVs, hi-fi, including compact disc players, as well as other products. It employs 1,200 people worldwide.

Mr Michaels expected JVC to export its computer to most of Europe, starting with France

He said: "At some stage you have to put something on the marketplace.

"The technology behind the MSX standard is not unique — it uses standard components. But we know the reliability and we know how to develop software for the computers.

"If you look at the problems other computer manufacturers are having you can see the advantages of existing technology. That isn't to say that our computers are absolutely fixed. There's a lot of things coming from Japan."

The general manager of Canon's systems division, Richard Kennedy, expected his company's computer to start arriving in October.

He was cautious, however, saying: "We are taking a very advised view of the market. We are very enthusiastic about the product and the market and we are trying very hard to get it right from the point of view of availability of software. From the past, we know that software can be a little late."

He expected Canon's 64K computer, costing about £250, to get a major marketing push in the spring of next year. By then, he said, it would be on sale in every major high street retailer.

He expected tremendous competition between the makers of MSX computers.

The objects of the MSX working party had been superb but "certain people" would now adopt the standard after the hard work had been done by the founders.

He said: "We are aiming at the audio and video dealer who we are already supplying.

"Some of the dealers, about 10 per cent, are already selling computers and they know a fair bit about them. We have two training centres, in London and in Leeds, and we'll

and Germany next year.

But supplies for the UK would at first be limited. He said: "It's very critical coming into the market in October. This year I don't think we will be able to meet demand because it's coming too late."

# New Series

# HOW TO USE YOUR MSX MICRO

MSX computers have been on sale in Japan since October 1983 and we have been fortunate enough to have had MSX models at Aberdeen since that time. The purpose of this series of How to MSX articles is to assist readers in understanding all the features and complexities of the MSX range.

The MSX concept is a simple one — MSX seeks to set a standard for home computers. Manufacturers joining the MSX Group agree to make computers to the same technical and software specification.

As all MSX computers have the same cassette, joystick, cartridge and printer interfaces, software and peripherals made by, say, Tobisha, will run on a Sanyo or any other MSX micro.

The MSX concept has had the backing of at least 20 of the largest Japanese electronic corporations since 1983 and they have been joined this by European giants G.E.C. and Philips.

MSX has already taken a large slice of the Japanese home computer market. With the might of companies like Canon, Hitachi, JVC, Mitsubishi, Sanyo, Sony, and Toshiba combining to make computers to a single standard, there is no doubt that MSX will also take a substantial share of the European market.

The manufacturers aim to

sell their micros as "family computers".

As each MSX Group member also manufactures home entertainment products it is no surprise that MSX micros can be interfaced with radio, TV, hi-fi and video equipment. JVC, the manufacturer which invented the VHS video system, has already shown its micro linked interactively with a video disc player. JVC and the other manufacturers see MSX as setting the standard for home computers, just as VHS sets the standard for video recorders.

Each MSX micro has an extended version of Microsoft Basic in ROM. Switching on a typical MSX micro boots the BASIC which is in a 32K ROM which occupies an area of memory from 0000H to 7FFFH.

The computer then finds the largest continuous block of memory from FFFFH down to 8000H and uses this for program and data storage. All MSX micros start up with white letters on a blue background. The following is displayed at the top left:

```
MSX BASIC version 1.0
Copyright by Microsoft
28816 Bytes free.
Ok
```

The start up mode is SCREEN 0 (detailed later) and line 24 of the screen displays the words:

```
color auto goto list run
```

to remind users of the initial definitions of the five function keys. This line changes to show:

```
colour closed" cont list. run
```

## ● Program 1 — displays bars of all 16 colours

140 NEXT J%,F%
```

when the shift key is pressed. Function keys 1 to 5 become F6 to F10 when pressed with the shift. This visual reminder of the key definitions can be switched off and on with the KEYOFF and KEYON commands.

All MSX micros have 16K of built-in video RAM which is separate from the main memory. There is no reduction in the amount of memory free when you are in high-resolution or multi-colour modes. There are four screen modes which are specified by the first parameter of the SCREEN command

The 16 colours available are:

- 0 transparent
- 1 black
- 2 medium green
- 3 light green
- 4 dark blue
- 5 light blue
- 6 dark red
- 7 cyan
- 8 medium red
- 9 light red
- 10 dark yellow
- 11 light yellow
- 12 dark green
- 13 magenta
- 14 grey
- 15 white

Program 1 displays bars of all the 16 colours on the high-resolution screen. After a short delay, the computer returns to the text mode.

Microsoft has obviously given a great deal of thought to the character set as it contains all the usual letters and figures plus many language, scientific, game and graphic shapes. The German umlauts, the French accents, circumflexes and the mathematical symbols will be especially popular with schools.

Program 2 displays all the 256 characters on the screen.

SCREEN 0 is the first of the two text modes and gives a format of 24 lines each with up to 40 characters. All UK MSX micros default to 37 characters per line when switched on.

The WIDTH command selects the number of characters per line. It is possible to get the full 40 characters by entering WIDTH 40.

All Japanese MSX micros default to 40 characters. Perhaps our Far East friends know that very few UK TV sets have a picture width control which can be adjusted by the customer and that many sets therefore "overscan"

Each character displayed in this mode is made up of 6 x 8 pixels. The built-in character set stores 8 x 8 pixels, but in this mode the right-most two columns of pixels are not displayed.

When the screen mode is changed to 0 or 1, the character set is copied from ROM (Read Only Memory) to RAM (Random Access Memory) so this makes it possible to re-define any of the 256 characters. This feature allows special characters to be displayed without going into high-resolution mode. Two of the sixteen colours can be used in this screen 0 mode — one for foreground and one for background.

SCREEN 1 is the second of the text modes and gives a format of 24 lines each of up to 32 characters. Again the switch-on default width is less than the maximum possible — the default for screen 1 is 29 characters per line. To get the full number of characters per line enter WIDTH 32, but on nearly all UK TVs the left-most character would be off the edge of the screen.

The MSX specification defines the use of two colours in SCREEN 1 mode. In later

● **Program 3** — demonstrates the speed of MSX computers

```
100 COLOR 15,1,1:SCREEN 2
110 FOR F%=1 TO 100
120 LINE (RND(1)*250,RND(1)*190)-(RND
(1)*250,RND(1)*190),RND(1)*14+2,BF
130 NEXT F%
```

issues of MSX COMPUTING, we will describe a programming method which allows all 16 colours to be displayed

At present the character set is split up into 32 groups of eight characters and the foreground and background colours of each group are the same effectively giving a two colour display. Our method will show how to alter the foreground and background colour of all these 32 groups.

Remember it is also possible to redefine the shape of each character in screen 1 mode

SCREEN 2 is the high-resolution mode which has 256 x 192 pixels definition. All 16 colours can be displayed at the same time.

The horizontal colour resolution is eight dots which means that in every group of eight adjacent horizontal dots, there can only be one foreground colour and one background colour. Any two of the 16 colours can be used for each group of 8 dots. The vertical colour resolution is one pixel, therefore any of the 16 colours can be placed next to each other vertically. There are many commands for creating hi-resolution patterns and they are all very flexible.

Program 3 demonstrates the speed of the computer and also shows all the colours. First the computer is put into SCREEN 2 (hi-res mode) and then 100 boxes of random sizes and colours are displayed

There is a command which allows printing of normal text on the hi-res screen. As the text can be placed anywhere on the 256 x 192 grid, this allows much greater control over where it is printed than in either of the text modes.

SCREEN 3 is the multi-colour mode and has 64 x 48 resolution. Each of the 3072 pixels on the screen can be in any of the 16 colours.

When text is printed to this screen, all the pixels that make up the characters turn on one

● **Program 4** — draws 200 lines and shows SCREEN 3 pixel sizes

```
100 COLOR 15,1,1:SCREEN 3
110 FOR F%=1 TO 200
120 LINE (RND(1)*256,RND(1)*192)-(RND
(1)*256,RND(1)*192),RND(1)*15+1
130 NEXT F%
```

● **Program 5** — a knight-shaped sprite bounces off the screen edges

```
100 COLOR 15,1,1:SCREEN 2,3
110 S$="":FOR F%=0 TO 31:READ A$
120 S$=S$+CHR$(VAL("&H"+A$)):NEXT F%
130 SPRITE$(0)=S$
140 DATA 0,1,6,1D,2A,2A,2A,1F,4C,F7,F
0,18,7,2,3E,FE,18,BF,65,11,C9,A9,B1,F
3,7F,9F,31,41,B1,B1,F9,FD
150 X%=128:Y%=96
160 XS%=1:YS%=1
170 PUT SPRITE 0,(X%,Y%),13
180 X%=X%+XS%:Y%=Y%+YS%
190 IF X%<0 OR X%>210 THEN XS%=-XS%
200 IF Y%<0 OR Y%>156 THEN YS%=-YS%
210 GOTO 170
```

of the SCREEN 3 pixels which are equivalent to a square of sixteen SCREEN 2 mode pixels. Since the letters are made up of 8 x 8 dots, and the screen has 64 x 48 pixels, you can get 8 rows of eight characters in this mode. This is useful for title pages etc.

Program 4 draws 200 lines at random positions on the screen and shows the size of the pixels in the SCREEN 3 mode.

MSX computers can display up to 32 sprites at the same time and can remember up to 256 'sprite patterns'. Sprites are characters whose shape, colour and position can easily be defined. They can be placed much more exactly than characters can and there are built-in collision detection routines. There are four sprite modes, these are specified by the second parameter of the SCREEN command

The four sprite modes are combinations of large or small sprites and magnified or unmagnified sprites. The modes are as follows:

- 0 8 x 8 unmagnified
- 1 8 x 8 magnified
- 2 16 x 16 unmagnified
- 3 16 x 16 magnified

The numbers refer to the number pixels make up the sprites e.g. a mode 2 sprite has 16 x 16 = 256 pixels. Magnified means that every pixel is the size of a square of four pixels,

so the sprites become four times their normal size.

When using a 8 x 8 size, the computer can store up to 256 sprite patterns. When using a 16 x 16 size, the computer can store up to 64 sprite patterns. Remember — only 32 sprites can be displayed at the one time

# New Series

# HOW TO USE YOUR MSX MICRO

Program 5 shows a sprite in the shape of a knight bouncing off the edges of the screen. To stop the program press the CTRL and STOP keys at the same time

Try changing both the occurrences of the number 1 in line 160 to 2 and note that the sprite moves faster.

## ON MUMMY!!

Your party of archeologists enter the pyramid in search of the mummies of the pharaoh's household. There are five burial chambers containing treasure, secret scrolls, keys, royal mummies and some nasty surprises. To pass from one chamber to the next, you must find the key and royal mummy, but beware, you may uncover a guardian, who will chase your group to avenge your desecration!!

A Machine Code game for those with nerves of steel and great courage.

Price (ZX81 & SPECTRUM) £4.95

## DISCO DAN

Can poor Dan decontaminate the atomic fuel rods in time?! In this new 3D machine code game, you control Dan Dan The Atomiser Man, jumping him from disc to disc, trying to reduce the ever increasing radiation levels, in the atomic pile. However, Up'n'Atom'Arry and his gang of vagrant particles are thirsting for the energy in your back pack, which makes life a bit awkward at times. Then there's Ron the Rapacious Robot, not the sort to meet in a dark alley (or anywhere else for that matter)!!

Price (48K SPECTRUM) £4.95

All prices include postage and packing. All cassettes despatched within 48 hours of receipt of order.

**Velnor's Lair  
ARE YOU?  
ARE YOU?  
ARE YOU?**

Quicksilver, 13 Palmerston Rd, Southampton, Hants SO1 1LL

Quicksilver's first adventure game for the Orc is a classic all-text version, similar in layout to most others of its type. You choose the role of a warrior, priest or wizard in a quest to destroy the evil Velnor. Your journey will take you through dark caverns and passages where untold dangers lurk but vast treasures may also be found.

If you like adventures then Velnor offers a good challenge, with logical thought and inspiration both playing their part. An option to save the game at any stage is provided which worked satisfactorily and is probably

essential if you do not have the patience to solve the puzzle in one go.

There is little assistance given and, by the nature of the game, this is correct. But perhaps some fundamental explanations of the very simplest moves and commands should have been supplied for the novice. The descriptions of your surroundings are quite realistic. If you are with children make sure they are not frightened by goblins, trolls or much worse nasties.

All in all, a fairly standard adventure without too many trials.

value for money	80%

**Star Force**

**32K BBC £9.99**

Argus Press Software, No 1 Golden Sq, London W1R 3AB

Another in the Mind Games series. My major criticism of this program is that the information screens, while clear and unambiguous, are most uninspiring. Even the major planet display is not very exciting.

The game is, however, a fully implemented, war based, strategy game and will appeal to those who enjoy a good long thoughtful battle amongst the stars. The aim is to destroy the home planet of the Zurgs or to capture, and keep, 25 of the other planets in the galaxy.

You start by choosing proportions of each type of fighting ship to commission for

the battle. Then you progress by three major stages, expressed as screens. The computer screen can give intelligence, energy status and fleet details whilst the navigational one allows star jumping, orbiting and attacking. If you are in orbit you may bombard, assault or retire. Notice that there is no chance of a friendly approach! In battle the screen is graphically much better as you watch the various ships being destroyed before your eyes. An interesting, yet not too long-winded, game to be sure.

instructions	55%
playability	80%
graphics	60%
value for money	70%

**Firelady plus  
Snakes and  
Ladders  
TIGRA £5**

The first is quite long and takes some time to load. Judging by the awkwardness of the instructions it was written by a couple of youngsters and viewed in that light it is a very creditable effort. I don't know why the main character is a "fire lady" but due credit for including the girls in the heroism charts.

A block of flats is ablaze and you must climb 10 floors to save an old man. You can play against the computer or another player and your movements are determined by dice. In fact, it's actually a revamped Snakes and Ladders — intelligently done, despite odd macabre moments. If you land on a smaller fire you must guess how many gallons of water are needed to extinguish it, and you've saved someone's life so you gain another throw; a skull and crossbones, and you'll need a '6', and of course there are ladders.

By the same authors, the second program, also long, is a bog standard Snakes and Ladders.

Both games make good, colourful use of graphics, and are aimed squarely at the younger users.

**Puzzles and adventures**

**Now get out of that! Our reviewers have tackled this software before, and this is what they think**

**Colony Crisis  
32K BBC £9.99**

Quicksilver, 13 Palmerston Rd, Southampton, Hants SO1 1LL

With a chance of winning £200 on completion of this game, enthusiasm overwhelmed me.

On loading you are presented with a screen full of complex passages and angled gates. You are at the top clutching a barrel which you can roll left and right or drop down. If you drop it, it falls down passages bouncing off the gates at right angles, falling into one of eight holes at the bottom. When the barrel drops on any gate it swivels to slant in the opposite direction.

The object is to fill all nine holes with 20 barrels, which is not as easy as it sounds. If a barrel is accidentally dropped in a full hole all the barrels in that

hole are wiped out. At first the game seems easy, but when you have only one hole left to fill you realise it isn't. If you're desperate the earthquake function can be used to swivel the gates at random.

After seeing the difficulty of the later stages I can safely say the £200 will be well earned.

**The Mystery of  
THE JAMAICA STAR  
32K BBC  
Electron £7.95**

Shards, 189 Eton Rd, Hford, Essex IG1 2UQ

If you like puzzles then this multi-faceted program may be just your cup of tea. To describe this as a program is far too mean, for the package comprises four individual, yet linked, games of different types and styles.

The first is called Bristol and involves the jigsaw type skills of piecing together a message. In London you must wander around researching your information ready to go exploring, the aim here being to get just the information you need at minimum cost in time and money. In Jamaica you go looking for an island to match your research and can survey those you find before landing to charter a boat.

Finally, you dive in your chosen location on the Seawitch in the hope that you find the ultimate goal — the beautiful Java Star ruby and all the gold that the wrecked ship carried. When you consider the cost of individual programs like this you can only conclude that this is exceptional value for money and unlike short action games, the work involved is likely to take a number of days if not weeks. Its claim to be educational is reasonably fair too. Well done Shards!

Meet the perils of refuse in **TRASHMAN – Commodore 64 £7.95**

The job may look easy but only you know the hazards. Speeding cars, cyclists, vicious dogs, over-reacting in the transport cafe or one too many in the pub! A Trashmans lot is not an easy one. Discover just how difficult for yourself in TRASHMAN on the Commodore 64

**ESCAPE & 3D TUNNEL – Commodore 64 £7.95 each.**

Follow the thrills! What lies in the tunnel's depths? Flying bats, leaping toads, scurrying rats, crawling spiders and there may be more... All appearing live in the dreaded 3D TUNNEL. Meanwhile, in the maze on the estates, what horrors lurk in the hedges? Where is the axe hidden? What prehistoric terrors will trap you? Can you survive the dinosaurs and the pterodactyls? Find out in ESCAPE if you dare! Available on the Commodore 64

**GATE CRASHER – BBC/ELECTRON £6.95**

An intoxicating game for the BBC and ELECTRON. Do you enjoy being killed by aliens? Has your keyboard melted away under the heavy artillery? Do you have nightmares of swooping birdmen? If so this is the game for you. It has none of these! GATE CRASHER is a game of skill and strategy that will test your mind to the limits. PLUS you will also have the opportunity to WIN £200!

**ELECTRO-ART – Electron £14.95**

Son of BEEB-ART! Create your own works of art with this simple to use, yet sophisticated feature-rich art tool which includes a full machine code 'Paint' routine allowing you to colour fill any shape. ELECTRO-ART is supplied in a box with a full instruction manual.

**VELNOR'S LAIR – Oric 1/Atmos £6.95**

Battle the evil Wizard Velnor in the caves of Mount Elc. VELNOR'S LAIR is simply the most enjoyable adventure you will play on your computer!

**MINED OUT For Bill the worm Oric 1/Atmos £6.95**

Following his success on the SPECTRUM, ELECTRON, BBC, LYNX and DRAGON, Bill the worm is now appearing in MINED OUT on the ORIC 1/ATMOS computers

#### COMING SOON

**ANT ATTACK – Commodore 64 £8.95**

The outstanding Soft So id 3D graphics of the breathtaking city of Anteschere are now available on the Commodore 64. Battle the giant ants to save your hero!

## Mined-Out 48K Oric/ Atmos £6.95

Quicksilver, PO Box 6, Wimbourne, Dorset BH21 7PY

A welcome change from space wars, Mined-Out requires more brain than brawn and one false move can lead to disaster. You are situated at the start of a minefield over which you must carefully pick your way to reach the next level. The snag is that you cannot see the mines and you only have one chance. All is not lost, however, since you know if one, two or three mines lie next to you and by getting the old grey matter working, it is possible to find a safe path.

As you progress, various complications arise but ultimate success is achieved when you

reach level 8 and are permitted to rescue the famous star Bill the Worm. A neat reply facility is included for all us failures.

A clever game, simple to pick up, but requiring skill to master. For more thoughtful players it should provide some hours of diversion.

My only quibbles are that only a fast load version is available and the inlay card, although amusing, did not describe the game very accurately. P.S.W.

## Gatecrasher 48K Spectrum £6.95

Quicksilver, PO Box 6, Wimbourne, Dorset BH21 7PY

No, it's not party time! You must drop barrels into a maze of tunnels, trying to get one barrel into each of the nine boxes at the base of the maze. However, the barrels look and sound like ball bearings!

If a barrel drops on to a gate it moves in the direction the gate is facing and flips it over.

A box will empty if a second barrel falls into it — and you're limited to only 20 barrels per level, so study the maze carefully! You are able to rotate the maze up or down and there's an earthquake feature which randomly alters some of the gates.

Levels five and six add a difficult twist. You must sort the barrels into numerical order. If a barrel drops into a box it swaps places with its neighbour on the right.

The keys are user-definable making the barrel-dropping machine easy to control. It's interesting that the screen shot on the inlay is from a different version of the game.

Enjoyable, simple at first but becoming much more difficult.

## Ugh! 48K Spectrum £5.95

Softek, 12/13 Henrietta St, London WC2

The Ice Age is coming so Ugh's got to stock up with food by stealing Ptery the Pterodactyl's eggs! Ptery, Rex the Tyrannosaurus and Alison the Allosaurus drop tones on Ugh.

As Ugh you must climb the hill to get the eggs. You have an unlimited amount of spears in your cave — but you can only carry one at a time. When you pick up an egg you leave yourself defenceless. Your pursuers are stupid and would be easy to avoid if it wasn't so difficult to move — to get on to a different path you must press up or down with left or right and be in exactly the right position. The rocks are accurate so they're difficult to avoid.

Graphics are excellent. Score and lives left are displayed on a tablet of stone, in keeping with the prehistoric scenario. The game starts with an excellent title screen and unbelievable sound. The keys can be redefined, or you can use a wide variety of joysticks.

Unfortunately, Ugh's lasting appeal is questionable because the 'maze' is tiny and there only appears to be one screen display.

# All-action arcade aces

These fun games are hot news. Test your arcade skill and experience against them

## Encounter CBM 64 £9.95

Novagen

This must be about the best arcade-style game I have seen on the CBM 64. It seems to be based on an arcade game which involves shooting line drawn tanks.

Encounter is a full colour game in which you must locate and destroy flying saucers. The display is a 3D picture with radar and scanners below. Cylinders on the battlefield deflect shots from both yourself and the enemy craft. Sometimes missiles home in on you. If you don't destroy them immediately they smash into your shields.

Once you have killed all your enemies on one level you may go through a gate to the next one. You are propelled through a

hailstorm. If you are hit by one of the spheres you are returned to the last level. If you get through you are awarded an extra shield and sent on to the next level.

The sound is excellent and really makes the game interesting.

Graphics are quite outstanding. The 3D display is fast, smooth and flicker-free in its movement. The explosions are spectacular as debris flies all over before twinkling away.

## Horace Goes Skiing Dragon 32 £5.95

Melbourne House, Church Yard, Tring, Herts HP23 5LU

Horace wants to go skiing — but the ski hut is on the other side of a busy road. He must cross the road to get some skis then cross back to tackle the slalom course.

The first part, crossing the road, is rather like Frogger, and the second part bears some resemblance to a car race game. The traffic is fast and furious, and you need a lot of patience and skill to reach the ski slope.

The graphics are excellent, among the best I've seen on the Dragon. The traffic is very convincing, with slow moving lorries and speedy little motor-bikes as well as cars and tractors. The flags and fir trees in the second stage are simpler but still very effective. The sound is also good, and not over-done for once.

The game can be played using the keyboard, or, preferably, a joystick. There are a few minor faults — the demonstration mode described on the cassette inlay didn't appear to exist, and there is a fairly long delay before the game re-starts after you lose a life on the road. Overall, though, it's a good, entertaining game.

# The more more you

Now that summer's finally here, all the insects are out and about and making the most of the warmer weather. So are you in this game.

You are a caterpillar and you spend most of the lazy hazy days of summer eating leaves. Your particularly favourite patch is the mushroom patch.

Eating leaves makes you grow at a miraculous rate. You can almost see yourself expand — it's a good thing that doesn't happen in real life! You must avoid bumping into your own body or colliding with mushrooms, or you'll lose one of your three lives. Once all your lives have been used up, the game ends.

Another obstacle to beware is the hedge bordering the

mushroom patch. If you touch it the game ends.

Your first patch has 20 mushrooms and 10 leaves. Once you finish a patch, you move on to a new one with five more mushrooms and one more leaf. This makes each patch harder than the one before.

Control the caterpillar with the four cursor keys, keeping the alpha-lock button down. If you find the game too fast, stop the caterpillar moving by holding down any other key apart from the cursor keys.

Your score, patch number and number of lives are constantly displayed at the top of the screen. You score 10 points for each leaf you eat, and whenever you complete a patch you get a bonus score. The bonus depends on which patch you've completed and how many of your lives are left.

At the beginning of the game simple instructions are displayed, but if you decide to play again at the end of a game, the instructions won't be repeated.

### How it works

- 10 go ahead to print instructions
- 15-60 first set of variables set-up
- 70 clear screen
- 80 set screen colour to black
- 90-110 set text to white
- 120-150 define colours
- 160-240 define characters
- 250-320 second set of variables set-up
- 330-360 hedge displayed
- 370-400 score printed
- 410-440 patch number printed
- 450-480 number of lives printed
- 490-610 mushrooms displayed
- 620-710 leaves displayed
- 720-730 display caterpillar
- 740 check caterpillar position
- 750 check keyboard
- 760-800 check for movement
- 810-1120 define new screen positions
- 1150-1160 check new screen positions
- 1170-1180 display caterpillar in new positions
- 1190-1220 check new screen positions
- 1230-1300 you've eaten a leaf
- 1310-1580 a patch is completed
- 1590-1650 you bumped into your own body
- 1660-1700 you hit a mushroom
- 1710-1800 you went into the hedge
- 1810-1840 display number of remaining lives
- 1850-1930 have you run out of lives?
- 1940-2200 end of game
- 2210-2240 display score and screen messages
- 2250-2370 display instructions

### Variables

- NOM number of mushrooms
- NOL number of leaves
- PAT patch number
- LI number of lives
- SC score
- Q detect position of caterpillar
- COT change text to white
- J,F,A,B,O,P used to move caterpillar
- LEAF number of leaves eaten
- CHAR shape of caterpillars
- MS hold screen messages and
- MD/MA positions of MS
- MUSH display required number of mushrooms
- Y/X positions of leaves and mushrooms
- WM1 check positions of mushrooms tops
- WM2 check positions of mushrooms stalks
- LEA display required number of leaves
- WAL check positions of leaves
- NUCD clear screen
- DELAY produce short delay
- NU change colour of caterpillar's body
- V change volume of sound
- NUCD clear screen
- SO change musical notes
- I display screen messages

### Hints on conversion

If you are going to try and convert this program to another machine, then remember the following points

- 1 The Texas has a 24 by 32 graphic screen
- 2 It has a 24 by 28 text screen
- 3 It uses user-defined graphics

A good amount of space can be saved by using multiple line statements. Below are the more unusual commands.

**CALL CHAR** (ASCII code number, hexadecimal string) Defines characters used in the program. The hexadecimal string describes the pattern to be given to the character with ASCII code

**CALL HCHAR** (row number, column number, ASCII code, number of repetitions) Places character on screen at row and column specified, and repeats it horizontally the number of times stated. If this fourth value is omitted then the character is displayed only once. The character used is the one whose ASCII code appears in the command.

**CALL VCHAR** (row number, column number, ASCII code, number of repetitions) Works the same way as CALL HCHAR only repeats vertically instead of horizontally.

**CALL GCHAR** (row number, column number, numerical variable) Equivalent of PEEK; assigns ASCII code of character at row and column stated to numerical variable

**CALL CLEAR** Clears the screen. Equivalent to CLS.

**CALL SCREEN** (colour code) Specifies screen colour, using colour code.

**CALL COLOUR** (character set number, foreground colour code, background colour code) Specifies foreground and background colours for all characters in set stated.

**CALL SOUND** (duration, frequency, volume) Produces sound with duration, frequency, and volume specified. Duration is in milliseconds, frequency in Hertz and volume in scale from 0 (loudest) to 30 (quietest).

**CALL KEY** (key unit, k,s) Equivalent of INKEY\$ or GET. Returns code if key pressed in variable k

These are the 16 colours:

- 1 transparent
- 2 black

## PROGRAM FOR PROFIT WITH YOUR SPECTRUM

Software has now outstripped the areas of basic and simple machine code programs. Do you have the ideas for games but not the know how to produce the code required? Are you put off by the complexities of writing complicated routines?

Have you the problem of finding the time to write (the) great adventure or arcade game? Professional software houses use special programs to help them generate their product. Now there is available to you a package of commercially marketed programs with which you can write your own text adventures, graphics adventures and arcade games. Packaged together with two books on arcade and adventure programming and sent to you with a free copy of our fact sheets "Programming for the games market" which includes many hints and tips and a Softwarehouse directory, you can now compete with the top games writers. (Programs include The Quill, Dungeon Builder, White Lightning.) Purchased separately these items would cost you £49.75. As a special offer we are packaging the items at £42.75 a saving of £7.00.

Send for your pack or send SAE for further details to

RAMTOPS, 47 BROOM LAND, LEVENSHULME, MANCHESTER M19 2TX

## LES FLICS ARCADE ADVENTURE FOR SPECTRUM 48K £6.95

You control that Pink character with the tail in your quest for the Purple Puma, a priceless gemstone, avoid the Police cars and enter the buildings, evading Gend'armene Kaolin (disguised as a chef) and of course Claudeau himself.

Pick up the items as you find them, we leave you to find out what they do!

Bon Chance

## TI-99/4A LANTERN TI-99/4A

### SAVE £££'s ON THESE SUPERB GAMES

£ Hunchback Haycock (BASIC) £5.95	£ Duddle's Hot Rod (BASIC) £4.95
£ Arcade action in TI BASIC. Race with Egor thru four castles and 24 different streets. Superb graphics and great fun.	£ Drive through sheep fields, woods, over rivers and avoid all obstacles, then pick up hutch-hikers down perilously twisting roads.
£ The Black Tower (BASIC) £5.95	£ Builder Minefield (BASIC) £4.95
£ Unlock the mysteries of the black tower and rescue the Lady (even in our latest full 16k adventure). Addictive and entertaining.	£ Two great games in one. Builder drive a truck, pick up bricks and build a wall but watch the obstacles. Minefield, drive a tank through a minefield while being shelled.
£ Runner On Trekton (BASIC) £5.95	£ Battlstar Attack (EXT BASIC) £6.95
£ You are on the planet Trekton your task is to collect jewels. The gemstone war graphic adventure requires skill and a good memory.	£ Stop the battlstar before it blows up your home planet. A fast game with excellent graphics. HCW said "even at level one a very addictive game".

### Special Offer

It's easy to complain about advertisements. But which ones?

Every week millions of advertisements appear in print, on posters or in the cinema. Most of them comply with the rules contained in the British Code of Advertising Practice.

But some of them break the rules and warrant your complaints.

If you're not sure about which ones they are, however, drop us a line and we'll send you an abridged copy of the Advertising Code.

Then, if an advertisement bothers you, you'll be justified in bothering us.

The Advertising Standards Authority. ✓  
If an advertisement is wrong, we're here to put it right.

ASA Ltd, Dept 2 Brook House, Torrington Place, London WC1E 7HN

This space is donated in the interests of high standards of advertising.

# The Key To Success!

Now, with the new Stonechip Spectrum Keyboard, the user has no worry of damaging the Spectrum itself as improved designing enables it to fit the case perfectly.

Assembling the case is simple as it consists of two halves, the top half containing the keyboard, with a small printed circuit board, attached by ribbon cable, plugging into the rear of the Spectrum. The lower half fits precisely around the Spectrum, thus preventing any risk of damaging through movement.

Your Sinclair guarantee need not be invalidated since the Spectrum does not require removal from its case.

## THE MAIN FEATURES OF THE KEYBOARD ARE:

- No modifications to Spectrum necessary as it connects via rear port.
- Full-length space bar.
- Built-in 'Echo' amplifier and tape interface.
- RESET keys remove the need to disconnect power supply lead.
- Single key 'DELETE'.
- Single key 'Extended Mode' selection (ie one key replaces the CAPS SHIFT and SYMBOL SHIFT function).
- Fully compatible with Interface 1 and most peripherals.

**STONECHIP ELECTRONICS**
